CONNECT WITH THE WIALON COMMUNITY

Wialon fleet management hubs. Exhibit with us globally

In 2025, Wialon is gearing up for an exciting journey across the globe! We'll be part of different industry events and build our iconic fleet management hub (ex-IoT zone) in **Mexico, Brazil, Colombia, and the UAE.**

What is fleet management hub? The Wialon fleet management hub is a special area that hosts an ecosystem of IoT companies: hardware manufacturers, connectivity providers, and developers of Wialon-based solutions. It serves as a platform that helps visitors to discover new business opportunities, connect with industry leaders, and stay ahead of the latest innovations.

We invite you to exhibit with us in the fleet management hubs to increase your visibility and get access to potential customers!

Why exhibit with us?

Turnkey booth. Save your time on thinking over the design, searching for competent contractors, and dealing with technical details — Wialon takes personal charge of the above and more.

Ample sales and networking opportunities. Connect with your target audience — hundreds of telematics service providers who are in need of your services and hardware for their projects.

Stay up to date with market trends and customer needs. Get access to Wialon networking events held one day prior to each expo, and get valuable insights and new opportunities to expand your business.

Promo support before, during, and after the expo. Benefit from visibility in our press releases, blog articles, and interviews dedicated to the event.

Cost and time savings. Take advantage of the Wialon package offer — exhibit with us at 2 or 3 exhibitions this year. It's cheaper than participating in each expo separately, requires less paperwork, and simplifies the planning process.

Each expo holds significant importance in its respective region, acting as a point of attraction for telematics service providers and large businesses seeking to incorporate innovative solutions.

Expo Seguridad

Mexico City, Mexico

June 24-26

Expo Seguridad is one of the biggest security events in Latin America. It brings together advanced technologies, products, and services in the security industry.
